

First Lady's Project

The First Lady's project this year is to refurbish the Auditorium. It is the second most used area by the Residents in the home, along with many community groups that utilize our auditorium for their activities.

We will be replacing the carpet, window treatments, chairs, refinishing all the wood on the Board of Trustees desks, doors, and paneling in the ante room, replace the spot lights and the Formica desk tops.

Should we be fortunate enough to raise sufficient money, we would also like to install a ceiling projector so the Residents can enjoy movies and install a computer where they can also use their computer talents to create Power Point presentations and have a place for them to present their creations.

For this to become a reality we need your assistance to raise the money necessary. I would ask that each District if you can, have a Fund Raiser for that one purpose.

Thank You,
Nancy Martinez
